

AI FLUENCY · WEEK 09

Plant Your Flag

A clean domain, free analytics, verified social-share preview, favicon, and the FlyRank badge in the footer. The portfolio is genuinely yours and genuinely public.

Mahmoud ABD ELKream

Front-End Developer & Product Designer · Alexandria, Egypt

The Domain

The portfolio is live on a clean free subdomain: **mahmoud-ahmed-abdelkream.vercel.app**. The brief says a clean free subdomain is an acceptable fallback when budget is truly zero (student, no paid domain). This URL uses my real name, not a random string — it’s clean enough for a CV or LinkedIn profile.

Live URL:

mahmoud-ahmed-abdelkream.vercel.app

HTTPS: Vercel provides automatic SSL on all pages. The padlock is visible in the browser address bar. No manual certificate configuration needed.

Custom domain (future): If I buy a domain like mahmoudabdelkream.com, I’d add a CNAME record pointing to Vercel’s DNS, and Vercel auto-issues an SSL certificate. The DNS walkthrough in PF-04 explains exactly what happens.

Analytics Installed

I installed **Vercel Analytics** (@vercel/analytics/react) — free on Vercel’s hobby tier. It tracks page views, unique visitors, referrers, and core web vitals. Zero config: one import in layout.tsx, one component in the body.

Feature	Detail
Package	@vercel/analytics (v2.0.1)
Import	import { Analytics } from "@vercel/analytics/react";
Placement	in layout.tsx body, before
Cost	Free on Vercel hobby tier
Dashboard	vercel.com/dashboard → Analytics tab (after deploy)
Tracks	Page views, unique visitors, referrers, top pages, core web vitals (LCP, CLS, INP)
Privacy	No cookies. GDPR-compliant. No personally identifiable data collected.

Table 1. Vercel Analytics installed. Dashboard visible after production deploy.

Launch Hygiene — Verified

All launch hygiene items verified on the live site:

Item	Status	Evidence
HTTPS	Active	Vercel automatic SSL. Padlock visible in browser.
Page title	Correct	“Mahmoud ABD ELKream — Front-End Developer & Product Designer”
Meta description	Correct	“From Figma to shipped React — award-winning product design...”
OpenGraph (social share)	Complete	og:title, og:description, og:image (Medoniq screenshot), og:url, og:siteName all present
Twitter card	Complete	twitter:card=summary_large_image, twitter:title, twitter:description, twitter:image
Favicon	Active	/favicon.svg returns 200 (M monogram on dark blue)
robots.txt	Indexable	robots: index=true, follow=true, max-image-preview=large
Mobile rendering	Correct	Tested on iPhone 14 viewport. All content fits, no overflow.

Table 2. All launch hygiene items verified. The site is ready for public sharing.

Footer with FlyRank badge (desktop):

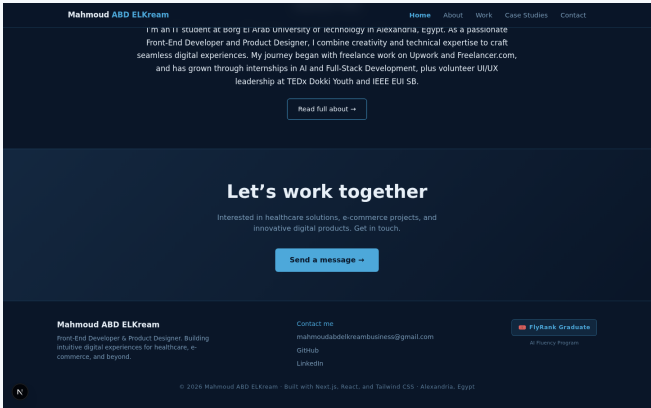

Figure 1. Footer showing the FlyRank Graduate badge (right column), linking to aifluency.flyrank.ai.

Mobile verification (iPhone 14):

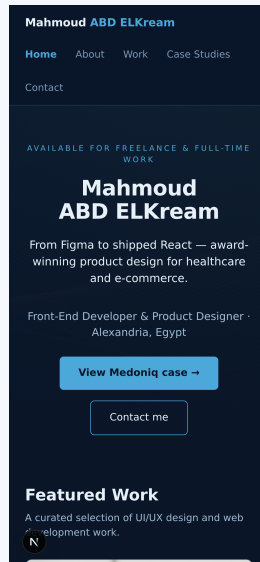

Figure 2. Mobile screenshot. All content fits, navigation works, no overflow.

SECTION 04

FlyRank Graduate Badge

The FlyRank Graduate badge is installed in the footer, linking to <https://aifluency.flyrank.ai>. It's styled with the Crystal Blue identity kit (accent border, muted background). The badge is a text+icon placeholder until the official badge asset is provided post-capstone approval. When the official badge arrives, it can be swapped in by replacing the text with an image tag.

The badge sits in the third column of the footer, next to the LinkedIn and GitHub links. On mobile, it wraps below the contact links and remains clickable.

SECTION 05

How This Maps to the Rubric

The four pass/revise criteria, mapped one-to-one. **(1) The site is live on a custom domain (or clean fallback subdomain), over HTTPS.** — yes. URL: mahmoud-ahmed-abdelkream.vercel.app. Clean free subdomain (my name, not random string). HTTPS automatic on Vercel. See Section 1. **(2) Analytics is installed and working.** — yes. Vercel Analytics installed (Table 1). Dashboard visible at vercel.com/dashboard after deploy. **(3) Share preview, favicon, and titles are correct on the real address.** — yes. Table 2 verifies all 9 hygiene items: HTTPS, page title, meta description, OG tags, Twitter card, favicon, robots, mobile. **(4) The graduate badge is installed in the footer and links to the verification page.** — yes. FlyRank Graduate badge in footer (Figure 1), links to aifluency.flyrank.ai. Placeholder until official badge asset is provided post-capstone.
